Lesson 7: Model Evaluation and Scoring

https://www.youtube.com/watch?v=pYXOF0jziGM

Note: In the Confusion Matrix widget, you have to actively click "Select Misclassified" to have the those entries sent to Scatter Plot.

Exercise: Even though you don't know what the parameters mean, play with the Logistic Regression and Random Forest widgets and see if you can get better results in the Test and Score widget.

Exercise: What do the terms "Precision" and "Recall" mean?
