Lesson1: Welcome to Orange

https://www.youtube.com/watch?v=HXjnDIgGDuI

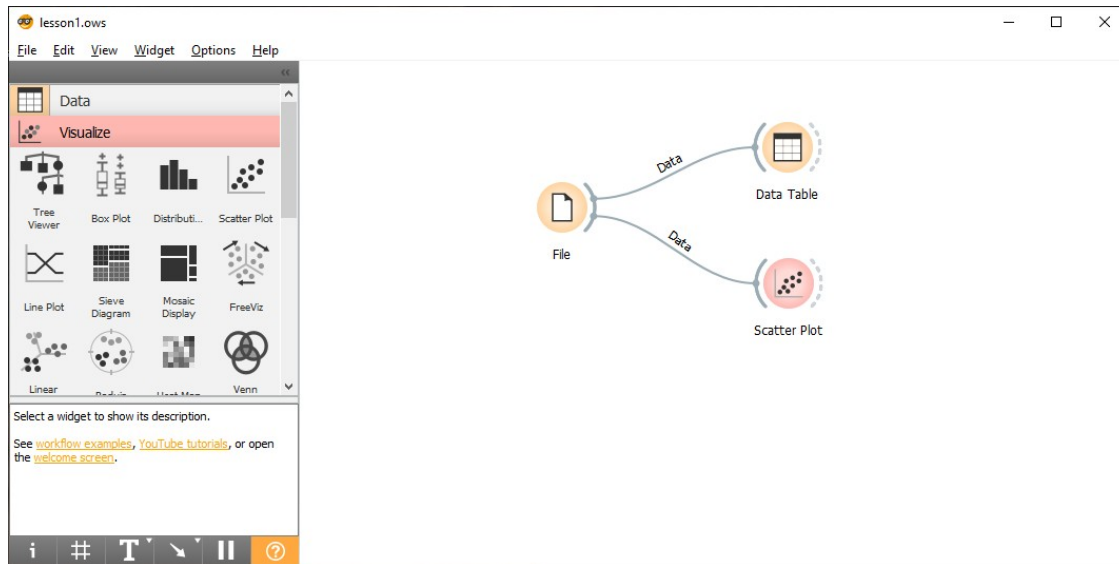

Exercise: Look up what petal and sepal mean. It is important to understand what your data represents.

Exercise: In the Scatter Plot widget, try each of the possible choices for Axis x and Axis y. Which is "best"? What does "best" mean?

Exercise: Try to come up with a rule for determining the type of an iris given its four measurements. Is it better to have a simple rule which is usually right, or a complicated rule is always right?

Homework: Find and share some data set you are interested in.
